

The Belgian Center for Occupational hygiene (BeCOH) is looking for an Industrial Hygienist Leader to manage and coordinate BeCOH projects.

About the business

BeCOH is a non-profit organization that wants to focus strongly on promoting knowledge of occupational hygiene.

"The aim of the association is to promote occupational hygiene worldwide by establishing a point of contact for companies and institutions in order to keep them sufficiently informed about standards, sampling plans and analysis methods. At the request of companies, the association is responsible for organizing the sampling, analysis and reporting in the context of occupational hygiene, while ensuring that the (quality) requirements are according to ISO 17025. BeCOH wants to make full use of the competences, expertise and infrastructure present among its members to provide expert answers. The association will also participate as an umbrella body in research on various aspects within the field of occupational hygiene.

Based on this, BeCOH wants to be a knowledge center. BeCOH wants to share this expertise with third parties. As laid down in the articles of association, BeCOH grants on a voluntary basis, through various organizations, its knowledge and resources (WHWB international and UK - Workplace Health Without Borders), and also supplies knowledge and resources to OHTA (Occupational Hygiene Training Association).

About the role

You will operate as the link between the laboratories, clients and the daily management of BeCOH.
